

**2 day weekend workshop 2023** for beginners and intermediate students

### **THE SIMPLE SEED POD**

This 2 day workshop will focus on the the simple seed pod. We will together construct pencil drawings, of varying compositions, studying the smallest details as an exercise in observation. After careful planning we will transfer these drawings with the use of tracing paper onto watercolor paper. There will be a lot of time dedicated to the practice of watercolor painting, before completing a small and detailed painting to completion. All paintings will be framed in a simple timber frame to compliment and protect your precious masterpiece.

The group will be of like- minded people in the peaceful surrounds of the Geelong Botanic Gardens.

The groups are always friendly and relaxed where your level of experience is irrelevant. Everyone will feel welcome and well catered for.
